Local Requirements

The following items are the various elements which should be submitted in support of proposals for these application types. **It should be made clear that not all the requirements listed will apply in all circumstances but that it will be for the applicant to demonstrate that they have had clear regard to those matters which are applicable.** For example, if the proposal falls below the affordable housing threshold in force at the time then it will not be necessary for the applicant to state such in their submission. On the other hand however, and for example, if the development proposed is located close to any trees, either on or off site, then it will be necessary for the submission to show that regard has been had to this fact. Consideration of the required points should be made under separate headings within the Design and Access Statement, or within a separate document if appropriate. The accuracy of any submission, and the completeness of the relevant information, will be assessed by our Validation Officers. A failure to accurately and robustly consider all of the relevant points will mean that the application is held as invalid pending satisfactory receipt of the necessary information.
